## I. BACKGROUND OF THE PROJECT

---

The San Carlos City hospital is known for providing public health and care services for many years. Such services like medication assistance; dental services; basic surgical procedures; emergency services; laboratory and radiologic examinations; and outpatient care. The city hospital has been continuously operating and catering the needs of the public and residents.

Occupants at the hospital, patients, kids, person with disabilities, and even medical staffs somehow feel psychological effect in their environment due to many reasons such as unfamiliar environment and presence of strange equipment for kids; person with disabilities may experience frustration due to their current body conditions in which they may experience hard times navigating areas in the hospital. Medical staff especially aides, and nurses also feel stress from overwork and somehow also affects their working habits.

To address this kind of environment considering the occupants' different needs and emotions, the city hospital must have an area in which it's not just for medical purposes only but a space to promote overall wellness, enhancing patient's recovery, improve mental health and showcase a family-friendly environment.

## II. GENERAL OBJECTIVE

---

The Design Concept aims to:

- (1) Improve open space by placing outdoor fitness equipment designed to promote physical activity; well-being and inclusivity for ages 13 and above.
- (2) Improve open space by placing a multi-play playground structure with integration of variety of play accessories, such as activity panels (sensory and interactive)
